Developer**
June 2013 - July 2015

Proficient

Knowledgeable

**Modern React with Redux
online course**
April 2017

Coventry University
Sep 2010 - June 2014

I am a Front-End Developer and Designer with a thirst for creativity. I build smooth apps and websites with a story, and while my passion lies in solving problems, my experience as an artist taught me that composition, colour theory and dynamism do not only apply to art, or at least not in its traditional sense. Front-end is a craft.

Experience

- Building a user Dashboard using React and GraphQL. Full integration with Sitecore via JSS services.
- Other responsibilities include mentoring colleagues, performing weekly code reviews and holding cross-team workshops.
- Lead Front-End developer in charge of building the new applicant flow for recruitment international company, Brunel. I was responsible for setting up the project, implementing custom validation throughout, tracking user behaviour and last, but not least, make things pretty.
- Reviewed applicants and carried out job interviews.
- Contributed significantly to maintaining and improving our open source Front-End boilerplate.
- Flexible front-end role where I occasionally got to wear the almighty full-stack hat. I built websites in FuelPHP and WordPress, while also managing a few multi-site templates for hospitality clients.
- Workflow included automation via Gulp, BEM methodology using SASS and version control through Git. Building modular and maintainable JavaScript codebases using object literals or module patterns as necessary.
- Responsible for project planning with clients, negotiating contracts, developing wireframes, mock-ups and high-end designs, as well as coding and maintaining websites.

Tools & Skills

HTML5 | CSS3 & SASS | RWD | Vanilla JS & jQuery | React & Redux | REST & GraphQL | npm & Yarn | Lerna | Gulp | Git | Jira | GTM | Agile & Waterfall | Photoshop | Sketch

Node.js | Webpack | Jest & Enzyme | JS Canvas | GSAP

Education

Instructor: Stephen Grider
